PROFESSIONAL SUMMARY

Full Stack Engineer (MERN, TypeScript) with 4+ years of production experience at Caprus IT. Delivered a 30% reduction in duplicate UI code, 40% faster MongoDB endpoints, and accessible (WCAG) interfaces across 5+ modules. Hands-on with REST API design, RBAC, AWS EC2, Nginx, PM2, Razorpay, and AI integrations (Azure Cognitive Services, Gemini API). Mentored junior developers and collaborated in Agile teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Material UI, Bootstrap, DaisyUI, Responsive Design, Accessibility (WCAG)

Backend: Node.js, Express.js, Socket.io, REST API Design, JWT, RBAC, MVC, Cron Jobs, Webhooks

Database: MongoDB, Mongoose, Aggregation Pipelines, Query Optimization, Data Modeling, Indexing

Cloud & DevOps: AWS EC2, Nginx (reverse proxy, SSL), PM2, Azure Blob Storage, Vercel, Render

AI Services: Azure Cognitive Services (Image Recognition), Gemini API (Content Generation)

GenAI Tools: Cursor, Claude, GitHub Copilot

Testing & Tools: Jest, React Testing Library, Postman, Git, GitHub, Razorpay, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer (MERN Stack Developer)

Jan 2022 – Present

Caprus IT Pvt. Ltd. | Hyderabad, India

- Architected full-stack MERN applications for education and marketplace domains supporting 4 user roles and 5+ product modules in production.
- Built a reusable React component library and custom hooks suite — cut duplicate UI code by 30%, saving 2–3 days per sprint.
- Migrated key frontend modules to TypeScript with strict typing for props, API contracts, and shared utilities — reducing runtime errors and improving onboarding speed.
- Designed granular RBAC for student, teacher, parent, and admin roles — permission-related bugs reduced to zero post-launch.
- Optimized high-traffic MongoDB queries and backend pipelines, cutting server response times by 40% on busiest endpoints.
- Mentored 2 junior developers through code reviews, pairing sessions, and onboarding — accelerated their ramp-up on the React/Node.js stack and internal codebase.
- Championed WCAG accessibility across all modules, improving keyboard navigation and screen-reader compatibility.

KEY PROJECTS

Aauti School — School Management System | *React.js, Next.js, TypeScript, Node.js, MongoDB | Caprus IT*

- Modeled MongoDB schemas and built REST APIs for 4 role-based modules (student, teacher, parent, admin) with isolated access scopes — cross-role access bugs reduced to zero.
- Delivered full assignment lifecycle APIs (create, assign, track) using MongoDB aggregation pipelines, serving 100+ students and teachers.
- Replaced external editor tooling with an in-app TinyMCE rich-text editor enforced via a shared component library — cut content creation time by ~50% for 100+ teachers.
- Built an AI image analysis & generation feature using Azure Cognitive Services (image recognition) and Gemini API (image and HTML content generation) — prompt-to-HTML output used by 50+ content creators in-browser; assets stored on Azure Blob Storage.
- Automated notifications via cron-based email jobs, eliminating 100% of manual reminder workflows.

Aauti Marketplace | *React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB | Caprus IT*

- Launched a multi-vendor digital marketplace with category-based search for service providers and consumers.
- Engineered a timezone-aware coupon engine that auto-activates discounts per user timezone — removed 100% of manual geo-promotion overhead.
- Built tiered pricing and package discount system secured with end-to-end JWT authentication — zero auth vulnerabilities since launch.

DevHive — Developer Networking Platform (Personal Project) | *React.js, Node.js, Express.js, Socket.io, MongoDB, JWT, Razorpay, AWS EC2*

Frontend: github.com/Mohan-1123/DevHive-web Backend: github.com/Mohan-1123/Devhive-api

- Built a full-stack developer networking platform with swipe-based profile matching, authentication, and connection management from scratch.
- Designed scalable Node.js / Express.js backend handling concurrent real-time users via Socket.io-based 1-on-1 chat (sub-100ms delivery); secured all endpoints with JWT.
- Integrated Razorpay (test mode) — order creation, payment verification, and webhook handling.
- Deployed React SPA and Node.js backend on AWS EC2 with Nginx (reverse proxy, SSL) and PM2 (auto-restart, zero-downtime).

EDUCATION & CERTIFICATION

NxtWave CCBP 4.0 — Full Stack Development (MERN) **Mar 2021 – Dec 2021**

Industry certification: React.js, Node.js, Express.js, MongoDB, REST APIs, JavaScript (ES6+)

Bachelor of Technology — Mechanical Engineering **2017 – 2020**

Aditya College of Engineering, Surampalem, Andhra Pradesh | CGPA: 7.1
